Profile

Every industry requires strong fundamental facilities to ensure its operation runs smooth and effectively. Infrastructure is the system which supports the utilities to function providing commodities and services essential to enable, sustain, or enhance societal living ecosystem.

Gema Insan Sdn. Bhd. is your total solution for smart infrastructure which refers to the physical networks necessary for the functioning of a modern industry.

We help your operations adapt to transformations, powers innovation and enable new business models and unleash unprecedented performance enabling you to enhance capabilities.

Integrating engineering and advance technology, Gema Insan combines techniques, skills, methods, and processes used in the production of infrastructures in the accomplishment of your business goals.

Our services provide tailored solutions incorporating ICT Services, Technology Equipment, Telecommunications, Power Solution and more.

Serving hundreds of organisations across every major industry, Gema Insan helps our clients achieve their business leadership objectives by minimising the operation cost and maximising the achievement of their smart infrastructure demand.

Our business philosophy has always been consistently providing our clientele the highest quality, unparalleled services and assistance.

Founded by Muhammad Najeli Md Norani and Ida Gustimar binti Dato' Hj Ariffin, sustainable foundation and strategic framework is at the heart of everything we do.

We have a passion for modern technology and take great pride in delivering quality results.

We look forward to work with you on future projects, our dedicated team of experts are always ready to be at your service.

Gema Insan, your trusted integrated infra technology solution provider.

Services

Gema Insan Sdn. Bhd. provide integrated infra technology solutions that provide high-level set of functions and procedures allowing the creation of applications that access the features or data of an operating system, application, or other service according to customers' varying requirements.

Engineering

We use scientific principles to design and build infrastructures items. We specialise in Electrical and Mechanical engineering to manufacture various electronic systems, energy systems, aerospace/aircraft products and more.

Telecommunications

We provide telecommunication services and systems covering Fibre Optic and Fixed-Data facilities for the purposes of information content transmission between or among points specified by the user.

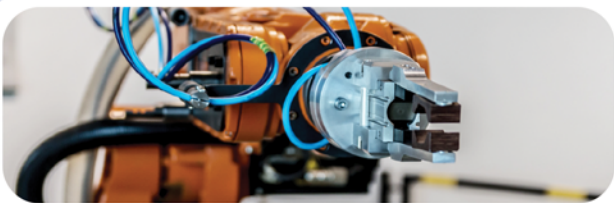

ICT Services

We enable users to access, store, transmit, and manipulate information by integrating telecommunications and computers, as well as necessary enterprise software, middleware, storage, and audiovisual systems.

Security Surveillance

We install surveillance cameras connected to a recording IP network. With our smart production techniques, surveillance cameras are simple and inexpensive enough to be used in home security systems, and for everyday surveillance.

Technology Equipment

We supply technology assets including mainframe computers, servers, general computer equipment and storage devices. We understand your products requirements and can identify and implement solutions.

Energy Solution

We reduce the amount of energy required to produce products and services by adopting a more efficient technology to decrease energy losses. We provide energy saving solutions for your operation requirements.

Industry

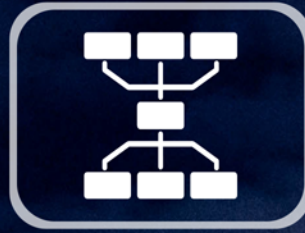

In-line with the nation's anticipation with the Industry Revolution 4.0, Gema Insan Sdn. Bhd. has already taken the big step by becoming one of Malaysia's leader in the infrastructure technology solution provider by delivering our services to organisations and companies in most major industries.
